The diagram illustrates the experimental design across three turns (TURN #1, TURN #2, TURN #3). Each turn consists of a 'FORWARD' phase and an 'AFT' phase. In the FORWARD phase, participants are presented with a 5x20 grid of numbers (1-20) and must select a number. In the AFT phase, participants are presented with a 5x20 grid of numbers (1-20) and must select a number. The AFT phase is shaded gray, indicating it is the focus of the study. The diagram shows the sequence of events for each turn, with the FORWARD phase leading into the AFT phase.

The diagram illustrates the experimental design across three trials (TURN #4, TURN #5, TURN #6). Each trial is divided into two groups: FORWARD and AFT. The FORWARD group is represented by a solid black bar, and the AFT group by a white bar. The sequence of steps (1-20) and a final step (21) is shown for each group. The AFT group is only present in the FORWARD trial, starting at step 11 and ending at step 21. The FORWARD group is present in all trials, starting at step 1 and ending at step 21.

Figure 1 is a schematic representation of the experimental design. It consists of a 2x5 grid of tables. The columns are labeled 'TURN #3' and 'FORWARD'. The rows are labeled 'AFT' and 'FWD'. Each table has 20 rows (numbered 1-20) and 10 columns (numbered 1-10). The 'AFT' row is shaded gray, and the 'FWD' row is white.

Figure 1 displays the spatial distribution of the probability of a subject's response being 'yes' for each of the nine items, organized by Turn (Turn #7, Turn #8, Turn #9) and Direction (FORWARD, AFT). The heatmaps show the probability of a 'yes' response across 20 rows (1-20) and 12 columns (1-12). The color scale ranges from 0.0 (white) to 0.5 (dark grey).

The diagram illustrates the experimental design across three turns (TURN #4, TURN #5, and TURN #6). Each turn consists of 20 trials, numbered 1 to 20. The trials are organized into three groups: FORWARD (trials 1-10), AFT (trials 11-15), and #6 (trials 16-20). The trials are represented by a grid of cells, with some cells shaded to indicate specific conditions or responses.

Figure 1 illustrates the experimental design across three turns (TURN #7, TURN #8, and TURN #9). Each turn consists of a 'FORWARD' block and an 'AFT' (Aftereffect) block. The FORWARD blocks show a sequence of 20 trials (1-20) with a shaded gray area indicating the time window for the forward task. The AFT blocks show a sequence of 5 trials (1-5) with a shaded gray area indicating the time window for the aftereffect task. The trials are represented by a grid of cells, with the shaded area indicating the time window for the task.

Figure 1 illustrates the experimental design across three turns (TURN #10, TURN #11, and TURN #12). Each turn consists of a 'FORWARD' phase and an 'AFT' phase. The 'FORWARD' phase shows a sequence of 20 trials (1-20) for five subjects (#1 to #5). The 'AFT' phase shows a sequence of 20 trials (1-20) for the same five subjects. The trials are represented by a grid of cells, with some cells containing a '1' or a '2'.

Figure 1 displays a 3x3 grid of heatmaps showing the distribution of AFT (After Time) and FORWARD (Forward Time) for three different turns (TURN #1, TURN #2, TURN #3). Each heatmap has 20 rows (1-20) and 20 columns (1-20). The color scale ranges from 0 (white) to 20 (dark grey). The distribution of AFT and FORWARD values is generally higher in the center of the grid and decreases towards the edges.

Figure 1 displays three heatmaps arranged in a 3x3 grid, showing the distribution of 20 turns for three different groups (TURN #1, TURN #2, TURN #3). Each heatmap has 20 rows (turns) and 20 columns (turns). The rows are labeled 1 to 20, and the columns are labeled 1 to 20. The heatmaps show the distribution of 20 turns for each group, with the distribution being relatively uniform across the 20 turns.

[illegible][illegible]

Figure 1 shows a 4x20 grid of squares representing a 400m track. The grid is divided into four horizontal sections, each representing a 100m lap. The top section is labeled 'AFT' and the bottom section is labeled 'FORWARD'. Each section has a vertical column of numbers 1 through 20 on the left, representing the lane numbers. The grid is used to illustrate the layout of the track and the positions of the athletes during the race.

Figure 1 displays 16 traffic signal timing diagrams, organized into a 4x4 grid. Each diagram represents a specific turn (TURN #1 to TURN #16) and shows the timing for five lanes (lanes #1 through #5). The diagrams are arranged in four rows and four columns. Each diagram has a 'FORWARD' section (lanes #1-#3) and an 'AFT' section (lanes #4-#5). The timing is represented by a grid of cells, with some cells shaded gray to indicate specific timing intervals. The grid is labeled with lane numbers 1 through 20 on the left and right sides of each diagram.
