### NOTES:

*Known Sphere Of Operation:* Empire-wide use

*Data Reliability:* a

*Major Data Source:* Klingon Sector Intelligence

The *D-7C*, introduced at the close of the Four Years War, saw no action in that conflict, but it was given its baptism of fire just seven months after entering service. The *D-7C*'s involved in the incident were so badly outclassed by their Romulan adversaries that the design was never fully accepted by starship captains, and the model was finally removed from service on Stardate 2/2004.

The *D-7C*, named '*Bringer Of Destiny*' from the Klingon K't'kara, had more efficient warp engines than those mounted on the *D-7A*, but they were incapable of powering all the weapons even though the ship was more maneuverable. The designers felt that the increased warp speed and maneuvering ratio would make this ship more cost-effective, even though it was a dismal failure because of it failed to meet its design requirements as a gunship due to its inability to power all its disruptors during combat. Furthermore, though the *D-7C* had slightly improved shielding, this advantage was lost due to its weaker superstructure. For some unexplained reason, Klingons have never put larger warp engines on this ship, though it seems that, if this had been done early in its career, it certainly would have outclassed anything the Romulans or Star Fleet had at the time.

Of the 162 *D-7C*s built, 52 have been placed in reserve fleets, 66 have been destroyed, 13 captured (9 by Star Fleet and 4 by the Romulans), 4 listed as missing, 18 sold to the Orions, 6 sold to prominent families within the Empire, and 4 sold to private groups or individuals in the Triangle.
