NOTES:

Known Sphere Of Operation: Empire-wide use

Data Reliability: a

Major Data Source: Klingon Sector Intelligence

The *D-7S* is an improved version of the *D-7M*, appearing to be a *D-7M* at first glance. Only well-trained personnel will be able to tell the difference on a sensor scan, but these cruisers mount six KD-8 disruptors and fore and aft-firing KP-4 torpedoes. In addition, some models carry the KCC cloaking device.

The *D-7S*, named '*Bringer Of Justice*' from the Klingon *K't'mara*, was being produced at the same facilities as the *D-7M*, which intelligence reports showed was phased out for this much-improved version. Reports indicate that 66 new *D-7S* hulls were built, with 65 of those remain in active service and one has been listed as missing by the end of 2299. Unconfirmed reports indicates that over 700 to as many as 850 or more *D-7M*'s were converted to this model. Data gathered from multiple sources show that 38 of these models have been destroyed, 1 has been captured, 4 are listed as mission, 10 were eventually sold to ranking families in the empire and 3 were scrapped after combat. As many as 180 may have been decommissioned and sold with a further 240 in reserve fleets. 466 are believed to have been converted to *D-7W*'s.
