NOTES:

Known Sphere Of Operation: Empire-wide use

Data Reliability: c

Major Data Source: Klingon Sector Intelligence

Even with it's need, it was not until 2300 that the Klingon Empire was able to produce a new variant of the *D-7*. The *D-7w* was first proposed as a massive improvement to the current *D-7v*. The *D-7w* became the center piece of the Klingon military efforts, with construction boosting to nearly 10 per year. The *D-7w* was considered the perfect medium cruiser, armed with KD-17, capable of increasing the striking distance of the *D-7* from 200,000 to 240,000 km.

While only in production for 8 years, over 460 older *D-7*'s were converted to this model. The *D-7w* is known to have been used extensively during the increasin conflict with the Romulans. 12 have been destroyed, 3 are listed as missing, 18 have been scrapped and 10 are used as training vessels. 231 are in reserve fleets and 18 were sold. 200 or more were converted to other models.
