

Garresh Class I Shuttle

Construction Data:

Model Numbers —	Type-1
Ship Class —	I
Date Entering Service —	2290
Number Constructed —	12,550

Hull Data:

Superstructure Points —	3
Damage Chart —	A
Size:	
Length —	10.6 m
Width —	6.8 m
Height —	3.6 m
Displacement —	4,758 mt

Cargo:

Cargo Units —	3 SCU
Cargo Capacity —	150 mt
Landing Capacity —	None

Equipment Data:

Control Computer Type —	CO-1
-------------------------	------

Other Data:

Crew —	1
Passengers —	6

Engines And Power Data:

Total Power Units Available —	2
Movement Point Ratio —	1/3
Impulse Engine Type —	CIA-2
Power Units Available —	2

Shield Data:

Deflector Shield Type —	Nav Only
Shield Point Ratio —	1/1
Maximum Shield Power —	1

Combat Efficiency:

D —	14.3
WDF —	0.0

NOTES:

Known Sphere Of Operation: Union-wide use

Data Reliability: A

Major Data Source: Cardassian Sector Intelligence

The smallest of the standardized naval shuttles, the *Garresh* is an unarmed sub-light transport used throughout the Cardassian Union and is found on nearly every ship within the fleet. The Type-1 is considered a military version due to its powerful sensors. A civilian version is also available without the additional cost of these components.

Well over 12,000 of these small craft have been produced with some lasting well over 60 years in operations. Like other light craft, the *Garresh* is designed for longevity and ease of replacements for its multitude of components. Few of these vessels have original parts, with re-manufacturing and replacement of components a standard procedure for naval engineers.

The *Garresh* can be flown by a single individual and had seating accommodations for up to 6 passengers. Removal of the seating allows for up to 150 mt of cargo or additional life support to extend the range of these shuttles beyond in-system operations.
