NOTES:

Known Sphere Of Operation: Klingon border, Federation Border

Data Reliability: D

Major Data Source: Romulan Sector Intelligence

After being launched in 2264, the *Exalted Vindicator* participated in over a dozen encounters along the Klingon/Romulan border before being reassigned to the Triangle border. After two years patrolling the region, the *Vindicator* was transferred to the Federation border where she continued patrolling for several more years.

However, in 2273 the *Vindicator* experienced a significant issue with its primary warp systems that resulted in the overloading of both warp nacelles. While the ship was able to eject both nacelles, the resulting explosions caused significant damage to the vessel and the decision was made to scrap the ship.
